

# BSTNG Nunchuck Grips

## **BSTNG** Nunchuck Grips

Challenge your grip strength and target your forearms with Body-Solid Tools Nunchuck Grips. Use Nunchuck Grips (also known as grandfather clock grips) for pull-ups similar to the classic towel grip pull-up or add them to a rig for a challenging monkey bar course. These state-of-the-art nunchuck grips provide high-level grip strength workouts but also offer targeted forearm movements similar to a rope climb.

Attach Body-Solid Tools Nunchuck Grips to a kettlebell or weight plate for additional grip strength movements like modified farmers walks. Non-slip matte red paint finish ensures stability throughout the movement and a strong nylon strap guarantees safe workouts every time.

## **Special Features**
