

## BSTWV 20 & 40 Lb. Weight Vests

### **BSTWV** **20 & 40 Lb. Weight Vests**

Specially designed to withstand the toughest workouts, the BSTWVP20 and BSTWVP40 are fully adjustable and allow you to customize weight and resistance up to either 20lbs or 40lbs (depending on the model). Customizing the vest is simple and easy — add or remove sand bags from the pouches in the vest to achieve the exact workout you desire.

Premium fabrics guarantee a comfortable fit and they feature durable stitching to ensure long-lasting use. The sandbag weights will provide a flexible weight option that perfectly conforms to your body.

The two adjustable straps are wider than on standard weight vests and feature durable Velcro to reduce vest movement during workouts and also allow for proper placement of the weights, resulting in optimal center of gravity without restricting any type of range of motion.

### **Special Features**

- Premium, durable stitching
- Adjustable up to 20lbs. or 40 lbs. (depending on the model)
- Fast and easy weight customization
- Flexible sandbag weights conform to body
