Bi-Angular® Multi-Station Gym

The Body-Solid G6B Bi-Angular Multi-Station Gym utilizes patented Bi-Angular® technology and a multi-station design to deliver a commercial-quality, high-intensity workout that increases muscle interaction by 25%. Built with industrial-grade steel and backed by a lifetime warranty, this versatile gym features specialized stations for total body development with smooth, natural movement patterns.

Special Features

- Patented Bi-Angular® converging press station replicates a free weight dumbbell press
- Perfect Pec Station is equipped with swivel arms and designed for both unilateral and bilateral movements
- The leg developer features self-aligning leg cuffs that pivot on a SmoothGlide Bearing System™
- 210lb. Selectorized Weight Stack, is upgradable to a 260lb. stack
