### GLEG

## Adjustable Bench with Cabled Leg Developer

The Body-Solid GLEG Adjustable Bench with Cabled Leg Developer is a versatile gym equipment that combines an adjustable bench and leg developer.

This convenient tool can be used on existing weight stack machines and attached to most low pulley stations, providing a broader range of exercises.

The leg developer cam provides consistent resistance throughout the entire range of motion, allowing users to perform leg curls and extensions quickly and effectively.

Weight: 99 lbs.

Dimensions: 76"L x 22"W x 26"H

## Special Features

- Installs on low pulley station
- 5 Seat pad angles of 0°, 5°, 10°, 15°, and 30°
- 7 Back pad angles of 0°, 15°, 30°, 45°, 60°, 75°, and 85°
- Weight Capacity: 600 lbs.
- Transport wheels
