

# GSR10B Body-Solid Stability Ball Rack

Body-Solid®  
Built for Life

Stability Balls not included

## GSR10B Stability Ball Rack

The Body-Solid GSR10B Stability Ball Rack is a compact and durable way to store stability balls in a gym. The GSR10B features a sturdy, v-shaped design ideal for placing in the corner of a workout room. This rack holds three stability balls and neatly displays them for easy access during training, workouts, or stretching. When not in use, the GSR10B keeps stability balls clean, organized, and off the ground, helping balls last longer while giving facilities increased space and safety. Configure the GSR10B Stability Ball Rack to store two or three stability balls depending on the gym or facility's needs. The Body-Solid GSR10B Stability Rack is the perfect addition to any workout room or fitness facility thanks to its sturdy design, heavy-gauge steel construction, and customizable configurations.
