LVBPB Leverage Bench Press

Engineered for elite training environments, the Body-Solid Pro Clubline Leverage Bench Press combines the raw intensity of free-weight training with the safety and biomechanical precision of a commercial-grade machine. Featuring converging, independent press arms and an ultra-durable 11-gauge steel frame, this unit is designed to maximize muscle development while ensuring lasting performance in the most demanding fitness facilities.

Special Features

- Adjustable press arms to fit all size users, with gas assisted start positions
- Sealed bearing pivot points
- Converging press arm movement for advanced biomechanics
- Independent, unilateral arm action for balanced muscle development
