### LVBP Leverage Bench Press

Body-Solid's LVBP Leverage Bench Press boasts a solid 2" x 3" 11-gauge steel mainframe, and an electrostatically applied, metallic silver, powder-coat paint finish. The press arms are adjustable, accommodating users of all size, with gas-assisted start positions. The bench facilitates converging press arm movement for advanced biomechanics, and independent, unilateral arm action for balanced muscle development. Among the bench's other features are ergonomic hand grip positions, sealed bearing pivot points, weight plate holders for plate storage, and durable double-stitched upholstery.

### Special Features

- Adjustable press arms to fit all size users, with gas assisted start positions
- Sealed bearing pivot points
- Converging press arm movement for advanced biomechanics
- Independent, unilateral arm action for balanced muscle development
