RF546

Rubber Equipment Mat

Designed and manufactured for workout intensity, comfort and value, these floor protectors offer solid rubber construction that absorbs the impact of free weights, home gyms, treadmills and kids rooms. Rubber flooring ensures natural, secure footing for excellent traction and superior impact protection. These pads will not tear, split, stretch, crack, creep, wrinkle or shrink even under the most brutal conditions. Installation is easy—no adhesive, no interlocking tabs—simply drop them in place. Best of all, they are worry free! No more floor damage, no more structural damage, and greatly reduced noise levels. Enhance any room with shock absorbing rubber mats. They're strong, stable, silent and tough.

Special Features

- Solid rubber construction
- Installation is easy—no adhesive, no interlocking tabs
- Black color is non-glaring for a soft, satin appearance
- Ensure natural, secure footing for traction and impact protection
