SPR500 and other attachments
sold separately.
SPRSP Spotter Platforms will fit onto
SPR500 or SPR1000 Racks

SPRSP Spotter Platforms

Designed with schools and group workout facilities in mind, the rack-mounted Body-Solid SPRSP Spotter Platforms add increased safety for rack-based workouts like bench presses, incline presses, and more. The spotter platform is stable and large with a 16"x11" surface area and features a diamond tread surface to ensure spotters have plenty of room to stand and won't slip or lose footing while spotting.

The SPRSP safely and securely attaches to Body-Solid's SPR500 and SPR1000 3x3" 11-gauge steel uprights. With a weight capacity of 1000 lbs., the SPRSP will remain solid, safe, and stable even during heavy lifts. These platforms are fully-adjustable and allow users to customize the height depending on the spotter's size and which lift is being performed.

Weight: 44 lbs.

Dimensions: 16"L x 18"W x 16"H
