SVKR1000B Vertical Knee Raise

The Body-Solid Pro Clubline SVKR1000B Vertical Knee Raise machine is the heaviest and tallest VKR machine on the market, offering exceptional versatility and effectiveness for pull-ups, chin-ups, dips, knee raises, and more.

The SVKR1000B features revolving dip handles, close and wide grips, and our exclusive rock-climbing grips. These let users perform dozens of exercises while targeting many muscle groups, including chest, lats, traps, abs, and obliques.

The machine's multiple steps make it easy for users of any size to access it, while the heavy-gauge oval steel frame ensures unmatched durability, regardless of the facility or frequency of use.

Weight: 373 lbs.

Dimensions: 62" L x 47" W x 103" H

Special Features

- Multiple close and wide grips, including neutral and rock climbing grips
- Revolving dip and neutral grip pull-up handles move out of the way
- Multiple steps make access easy for any size user
- Heavy-gauge oval steel frame ensures unmatched durability
- Distance between dip handles: 22.5" or 31.5"
